Campus Roundup

Nursing's Brower Steps Down to Resume Teaching

H. Terri Brower, dean of the School of Nursing since 1985, stepped down from her post at the end of winter quarter to return to teaching. She will remain a member of the Auburn faculty.

During her tenure as dean, the School of Nursing developed a faculty manual and a student handbook, received its first research grant, and established a computer laboratory. Dean Brower also helped oversee the renovation of the school's quarters in Miller Hall.

"The nursing program has made significant progress under Dr. Brower's leadership," said Dr. Warren Brandt, vice president for academic affairs. "Of particular note have been improvements in the curriculum by strengthening the professional nursing component, increasing the number of hours of theory and clinical expertise, the addition of computer training, and gerontological nursing."

OUTSTANDING FACULTY—The SGA recently announced this year's Outstanding Faculty Members, chosen annually in each college and school. They are, seated, left to right: Eva Pfeil '67, Architecture; Gary Trentham, Human Sciences; Joseph Kicklighter, Liberal Arts; and Barbara Wilder, Nursing. Standing: Bor Jang, Engineering; Charles K. Born, Pharmacy; Warren Flick, Forestry; Clinton Baker, Business; Joe Yeager '43, Agriculture; Ray Cooper, Sciences & Mathematics; and Laverne Krista, Veterinary Medicine. Not pictured is Thomas Worden, Education.

Sauser Named Associate VP of Extension

William I. Sauser, Jr., former head of the Department of Management at AUM, is the new associate vice president for extension at Auburn. In his new position, Dr. Sauser will coordinate the extension programs and activities of various university units and be directly responsible for the involvement of the new Auburn University Hotel and Conference Center in the university's outreach programs.

Dr. Sauser served as director of the Industrial/Organizational Psychology Program at Auburn before moving to AUM in 1984 as associate professor and head of the Management Department. He was named a full professor in 1986. Dr. Sauser holds the bachelor's degree in behavioral management and the master's and doctorate in industrial/organizational psychology from the Georgia Institute of Technology. A state-licensed psychologist, he also serves as co-editor of *The Southern Business and Economic Journal* and is a member of the editorial board of the Society for the Advancement of Management's advanced management journal.

William Sauser

Hirth Honored With AIChE Fellow Status

Leo J. Hirth, Basore Professor in the Department of Chemical Engineering and a member of the Auburn faculty since 1962, has been named a Fellow by the American Institute of Chemical Engineers (AIChE). Recognizing outstanding contributions to both the profession and the institute, AIChE Fellow status is one of the highest honors a chemical engineer can receive. To qualify, a person must have been a practicing engineer for more than 25 years and a member of the Institute for 10 years. Fellow status also requires the sponsorship of five peers.

In honoring Dr. Hirth, the institute's governing council cited his contributions to chemical engineering education, particularly in the development of a computer-aided design course for seniors. He is a three-time recipient of Auburn's Outstanding Chemical Engineering Professor Award and has been honored with AIChE's Student Chapter Counselor Award. Dr. Hirth is also a member of the American Society for Engineering Education and the American Association for the Advancement of Science.

Theodore Becker New Political Science Head

Theodore (Ted) Becker, chairman of the Department of Political Science at the University of Hawaii, will become head of Political Science at Auburn effective Aug. 1. Dr. Becker holds bachelor's and law degrees from Rutgers University, a master's from the University of Maryland, and the Ph.D. from Northwestern University. He is the author of eight books on American government and also has more than 26 years of teaching experience.

Prior to joining the Hawaii faculty in 1969, Dr. Becker taught at Northwestern, Michigan State, and Wayne State Universities. He has also served as visiting professor at a number of institutions, edited *Intellect*, and *Hawaii Current* magazines, and served as a consultant for government and private projects in Hawaii, California, and New Zealand.

Pharmacy's Barker Among Pioneers Honored in Video

Dr. Kenneth N. Barker, professor and head of the Department of Pharmacy Care Systems, has been honored nationally for his work in developing a drug-dispensing system in wide use at hospitals across the country.

Dr. Barker, the designer of the "unit dose" system of pre-packaged, computer monitored medication delivery for hospitals and other major health care facilities, is featured in "Imagination," a historical multi-image presentation which traces the path of significant contributions made to pharmacy practice by researchers. The program premiered recently at the annual meeting of the American Pharmaceutical Association and is available nationally to pharmacists and educators through that organization.

Student Retention At Ten-Year High

Ninety-six percent of the record 19,502 students enrolled during fall quarter returned for the just-completed winter quarter, reflecting the best fall-to-winter retention rate at Auburn in more than a decade. Partly due to large fall graduations, winter quarter enrollment figures have historically reflected the largest drop of the year. For the second consecutive year, however, Auburn's enrollment has climbed.

According to registrar Tom Stallworth, the high retention rate is a product of several factors, including student quality, increased graduate enrollment, and a stable economy. "The quality of entering freshmen has risen over the past four to five years," he said. "The increase in their abilities means they're increasingly motivated and talented enough to stay in school."

"Graduate enrollment is another factor affecting retention rates," he continued. "We have more graduate students, and they tend to remain in school year-round, whereas undergraduates may take quarters off. Another reason more students are able to remain enrolled is the strong national economy. There have been no drastic economic changes to drive students into the workforce."

If Your Blood Runs Orange and Blue, Try This Test of Your Auburn IQ

Are you a true orange-and-blue-blood? If you are, we'd like you to prove it by entering our campus photo contest. We've collected a few pictures of some of the university's lesser-known nooks and crannies, and we don't think there are many readers out there who can identify all 12. If we're wrong and someone can name the spots pictured in all 12 photos, we're going to give away four prizes and identify the winners in the June-July issue of the *Alumneus*.

First prize is a first-edition copy of *Auburn University: A Photographic Portrait*, by nationally-acclaimed photographer Tommy Thompson of Atlanta. The book, which comes with a deluxe binding and slipcover, will be individually-numbered and signed by the photographer. Second prize is a "talking tiger," a plush stuffed talking Aubie that is perfect for young children. Third prize is an "Auburnopoly" game, played like Monopoly, but designed with Tigers in mind using campus and town sites and personalities. Fourth Prize is a set of Auburn tumblers, perfect for a congratulatory toast after winning the contest. All prizes other than the book are being provided through the generosity of Johnston and Malone Bookstore in Auburn.

The contest is open to all dues-paying members of the Alumni Association. To enter, send a single sheet of paper numbered on one side only, from one through 12, with the correct responses alongside the numbers. Responses should be as brief as possible, but should name the building or object pictured by specific name and/or location. Include your name, class year, and address, and mail it to: AU Photo Contest, *Alumneus*, 116 Foy Union, Auburn University, AL 36849. Only one entry per person please.

The winner of each prize will be determined by drawing from among all correct entries received by the deadline date, which is May 4, 1988. Winners will be notified and prizes sent by mail.

Here and There—

A Man from Beatrice

By Jerry Roden, Jr., '46

Elsewhere in this issue, Kaye Lovvorn pays tribute to the late Oliver Turner Ivey as one of the finest teachers in the annals of Auburn University. Kaye has chosen and covered well this unusual man's central contributions: his scholarship, his teaching history to university students, and his stimulating high school teachers to breathe new life into their classes. Yet something remains to be said, for Turner Ivey was a rare individual who dared always to be himself and who, therefore, taught as much by the example of his life as he did through his formal teaching endeavors.

Roden

Oliver Turner Ivey began life on October 11, 1906, at Beatrice in north central Monroe County and grew up on his family's holdings there. Then, he came to Auburn for his undergraduate education, which he completed in 1926. Soon thereafter he embarked on graduate studies in history here and received his Master's in 1928. After teaching history at Auburn for a while, he entered the University of Chicago in 1929 and earned a Master's in history there in 1930. Thereafter, he returned to Auburn and taught here until 1934, when he returned to Beatrice and his family's business.

Two related events influenced his departure from Auburn: The first was his marriage to Caroline Lawson of Smiths, and the second was a financial crisis in Alabama education which had Auburn paying its faculty with vouchers, useful—Professor Ivey said—only as very temporary patches for threadbare clothing.

He managed the family lands and lumber business, including a major sawmill operation, at Beatrice until he received a call to active duty during World War II—as an Auburn ROTC graduate he held a reserve commission. From 1943 to 1945, he spent about two years in the Southwest Pacific, serving in such places as the Philippines and New Guinea, and rose to the rank of lieutenant colonel.

After the war, he returned to Auburn in 1946 to teach and in addition took over the management of Lawson Farms at Smiths upon the death of his wife's father.

With his wife's health declining, he retired from Auburn University in 1969 in order to make with her a long-anticipated tour of the world. Together they spent a leisurely year visiting far-away places about which he had taught and of which they both had dreamed for decades.

Not too long after their return from that successful pilgrimage around the globe, Mrs. Ivey lost her gallant battle against the illness that had beset her for several years. Thereafter, Professor Ivey spent the major portion of his remaining life promoting improved teaching of history in high schools.

In addition, he continued to manage Lawson Farms very actively until his right-hand helper, Joe Dot McCoy, was killed in a tractor accident on the highway at Smiths about 1972 or 1973. Thereafter, his agricultural activities declined, but he continued to oversee the house and lands until the time of his death.

On February 10, 1988, Oliver Turner Ivey died at the Medical Center in Columbus, Georgia, from injuries sustained in an automobile accident which occurred on February 7 not more than two hundred and fifty yards from his home in Smiths. He had lived a bit more than eighty-one fruitful years.

Beyond the educational accomplishments cited in Kaye Lovvorn's column, Professor Ivey left a legacy of at least two other major achievements which still endure and which require explicit recognition here.

First, in a quiet, direct, and unassuming manner, Turner Ivey effected some notable improvement in human relations in Alabama. He exerted influence both formally and informally. During the tense years of the Civil Rights struggle, Professor Ivey served as a member of the Board of Directors of the Alabama Council on Human Relations, working in concert with other stalwarts of reason and justice such as Dr. Charles Goode Gomillion of Tuskegee and Dr. Lucius Pitts of Miles College. Informally, apparently throughout his adult life, he ministered to the sick and needy of his acquaintance, regardless of race, color, or creed. Even though he has been gone from his native Beatrice for more than forty years, black folk there and from there still remember that "Turner Ivey helped people in need. . .black and white alike."

Second, in both his professional and personal activities, Professor Ivey established a pattern of zestful living that many of us could emulate to advantage. Throughout most of his years, he paced through life with the energy, grace, and speed of a fine-blooded horse. He savored learning, culture, intellectual exchange, and excellent cuisine. And he satirized cant, hypocrisy, pomposity, and pretentiousness with a fine and cutting disdain. No man was too lowly for him to bend without a question to lend a helping hand, and no man was too highly placed to indulge in folly and escape his trenchant wit.

Friends and relatives held a memorial service for Professor Ivey at his home in Smiths on February 14. In addition to the appropriate rituals conducted by The Reverend Bill McLemore, Professors Edward C. Williamson and Donathon Olliff read some literary excerpts which Professor Ivey recently had asked his niece Laura McMillan Brice to copy. Among those quotations was the following from Rudyard Kipling's "The Ballad of East and West":

Oh, East is East, and West is West and never
the twain shall meet,
Till Earth and Sky stand presently at God's
great Judgment Seat;
But there is neither East nor West, Border,
nor Breed, nor Birth,
When two strong men stand face to face
though they come from the ends of the earth.

The last two verses of that stanza sum up the insight, the wisdom, and the example of one strong man who came up to Auburn from Beatrice and helped make Alabama a better place.

LITERARY LEARNING—American literature is even more interesting for sophomore Cynthia Straight when studied outside. *—Photo by Steve Stiefel*

Esoterica for Everyone—

Fishy Business

By Bob Sanders '52

When you want some advice, it's best to go to an expert. Thus, it came to pass that I approached the internationally acclaimed head of the Tadpole Department at East Alabama Male College. "Dr. Clam," says I, "that time when I caught my first bass a couple of hundred yards downstream from the Iron Bridge on Yellow Creek that July 4th on a Hawaiian Wiggler, what kind of bass was it?"

"In the first place," he replied, wrenching his mind visibly from an in-depth study of the Second Law of Theromodynamics, "you didn't call it a bass, did you?"

"No," I said, realizing that I had gone back on my upbringing. "It was what Uncle Kent and everybody else in Frontier Country called a trout."

"That's right," he said gently. "You called it a trout. But what it really was, was a spotted bass."

"Not a largemouth?" I asked.

"Probably not," he said. "Once upon a while there might be a largemouth on the larger streams up there, but probably not on upper Yellow Creek, and even more probably not on Little Yellow Creek."

All right. I thanked Dr. Clam and went on my way.

Then I remembered a special *Field & Stream* issue of several years ago, one of their anniversary editions or something, that I had saved because it had some exceptionally beautiful and accurate paintings of all the different members of the bass and sunfish families.

Yeah, I think he was right. There's the largemouth and the smallmouth and the redeye...and the spotted. Yep. I do believe that's what I used to catch once in a great while, off the bridge at the swimming hole, or down in the pasture when I'd go to get the cows, and that first one. And all the time, I'd thought I'd been catching underfed and scrawny largemouths, after I learned that they weren't brookies or rainbows. You turn the page and you find something else you didn't know. And shortly after that, I had a conversation with another fish specialist, kind of the Isaac Walton of lower Yellow Creek and Cutbank Creek, and

the sloughs down around where the village sewage dumped into the creek. The subject of goggle-eyes came up. Looking at my pretty pictures, I said, "All right, which one of these is a goggle-eye, is it the warmouth or the rock bass?" (They look pretty much alike.)

He waffled. Hmmmm. He caught a whole towsackful of them in a slough down below town one time, he said, but he wasn't sure.

His uncertainty can be appreciated, a bunch of the bream look alike. There's the bluegill and the red-ear bream (which I think is what we call the shellcracker), and there's the punkinseed and the redbreast, and a whole bunch of others that we used to just call perch, except we'd call the red ones sunfish.

Crappie were white perch, and not many people caught any, except at certain times of the year, cousin Walter Chandler would go over to a special place on Yellow Creek—nobody ever knew exactly where—and catch a mess of them. Whether they were crappie or black crappie I don't know. They were white perch.

"Hey, that's a gov-mint bream," my expert friend would say.

"Say what?"

"A gov'mint bream," he said, looking at the picture of what *Field & Stream* called a flier. "They stocked some around here one time, and that's what people called them. Gov'mint bream."

I never was too certain about the nomenclature of the little things I used to catch in the creeks. They were mostly so thin they were translucent, some kind of feeble with hunger, unless they were below the sewage outlet.

And there's the additional problem that some of them readily hybridize, making positive identification even harder. Anyway, they were perch.

Then somebody asked, "What's a grinnel?"

"The most accepted name is a bowfin," said Dr. Mussel.

We all agreed that the bowfin, grinnel, whatever, is often called names that don't appear in family publications. We also agreed that we'd never seen them eaten. There was always somebody down the road a piece who would eat them, like the time Turner Falkner and I, after giving up on bass way down there on lower Yellow Creek behind his house, started catching grinnel out of a slough. We took them to some people on down the road. Heck, they might even be good, for all I know. I heard one time, about third-hand, that if you ate them right off the stove, real hot, they weren't bad.

But it was sort of like eating possum. I just never worked up a strong appetite for them.

A real fun fish to catch was the jack, which I found out many, many years later is the eastern chain pickerel. I've seen them follow a plug right up the bank 20 times before finally striking. *Field & Stream* says they're good to eat if you do them a certain way to ease the threat of the bones. We never tried to.

Goggle-eyes, trout, sunfish, grinnel, white perch, gov'mint bream...they just don't name fish like they used to.

The Editor's Column—

Remembering a Teacher

By Kaye Lovvorn '64

When Oliver Turner Ivey '26 retired from teaching at Auburn in 1969 after spending most of four decades on the faculty, one of the pillars of the Auburn History Department moved out of the classroom. But he never left education. In the 19 years that passed between his retirement and his death on Feb. 10, 1988, he never stopped his search for knowledge or his efforts to contribute to knowledge.

A STROLL IN SHADES—Diane Andress, a sophomore in pre-business, soaks up the spring atmosphere during a stroll across campus. *—Photo by Steve Stiefel*

From the time he started teaching at Auburn in 1928, students found Professor Ivey one of their most memorable teachers; and however he was regarded, it was never with indifference. He had too many opinions, too much energy and enthusiasm, and he supported too many causes to be ignored. As a secretary in the History Department once responded to a question about Prof. Ivey, students (and often colleagues) either swore by him or at him. His classroom was always a whirlwind of activity. Ideas, reactions, responses came from the professor fast and furious. Nobody went to sleep in his class. Not even on the third floor of Samford Hall in the late spring or summer. The wit of his lectures and the interplay of his mind in response to student comments and questions were enough to banish spring fever, even without his slamming his hands down on the desk to emphasize a point, flipping maps, pointing, or his constant moving around the classroom, darting to the front or back. Although I never saw any of his ETV courses on the Six Faces of History, I've wondered how he kept still enough for the camera to focus. And certainly, the lack of audience response must have cramped his lecture style.

When Prof. Ivey retired in 1969, several of his former students commented on his teaching for a story for *The Alumnews*:

To Robert Pitts '39, now emeritus head of Aerospace Engineering, Prof. Ivey was "the only man I ever saw who could make history interesting....He was a tremendous teacher. I have never known more than three or four (teachers) in his class."

Albert Killian '52, now retired from a career at Auburn, found Prof. Ivey's class in international organizations "the most stimulating class I had in college because of his requirement that students must think.

"He was not only prepared to teach the course, he was prepared to understand the students. He could tell which students were in there to kill time, to learn, or just to get credit—his perception was almost uncanny," continued Mr. Killian. "His stimulating lectures made the subject real. As you can imagine, a discussion of the organization of the Pan American Union normally doesn't make a student sit on the edge of his chair, but Prof. Ivey had a sharp wit and he uses it in the Biblical sense of a two-edged sword, on the subject and on the student. He is one of the best teachers I have ever known and far exceeded any other in communicating with the students."

Prof. Ivey viewed the teacher's role in the learning process as a combination "cheerleader, instructor, judge, friend, and slave driver." The latter was necessary he felt because a university had to have somebody to define the standards of excellence and hold students to them. He believed the best student-teacher relationships end up in friendship and because of the sizable number of his former students who consider themselves his friends, he succeeded. "Teaching," he maintained "is the goal; friendship is the icing on the cake."

I mentioned Prof. Ivey's causes—the biggest one was history itself. He moved toward the teaching of history with a missionary zeal that focused on the role of history in the lives of us all and in its influence on the future. He passionately believed that the knowledge of history had led the founders of the United States to choose democracy and that if our democratic experiment is to last that it requires an educated citizenry who know history. Consequently, whereas most college teachers consider high school history teaching as dreary work and largely useless, Prof. Ivey regarded it as the key. The chances for the United States' survival and world leadership, he said, "rise as the understanding of our citizens rises, fall as the understanding falls." Because the majority of voters get their understanding of history in high school, he felt that effective high school teaching is indispensable. He believed that "the level of wisdom in this country corresponds to the level of the high school teaching."

Consequently he was always willing to work in any way he could to inspire or contribute to the level of teaching.

History—and Professor Ivey often taught Russian, Far Eastern, or Latin American History—was to be seen in his classes in the fullness of its ramifications. Students who were good at memorizing dates alone or those who just wanted to read for the stories they found in history equally were apt to be dismayed in his class. History as he saw it couldn't be isolated—it depended on

Features

Veterinarian Rand Keeps Patients on Pins and Needles

By Mary Ellen Hendrix '84

Acupuncture. The word conjures up different images for different people. Acupuncture is thought by some to be nothing short of voodoo. Others believe it a medical miracle, replacing the need for other treatments. Howard Rand '65, DVM, agrees with neither of these extremes. Instead, he sees acupuncture as a realistic addition to the other methods of treatment used in his veterinary practice.

Owner of Horse & Hound Hospital in Marietta, Ga., Dr. Rand has used acupuncture to treat animals since 1976, when he learned the technique from an accredited course offered by the International Veterinary Acupuncture Society. He even practiced his new-found art on his family. "When I started," he said, "I tried it on everything just to learn how to put needles in and what works and what doesn't."

Although it was recently approved by the AVMA, meaning it's no longer considered experimental, animal acupuncture is used only by a small percentage of veterinarians. Dr. Rand identifies part of the problem as the difference between Western and Eastern medicine.

"The way we're trained in Western medicine, you have to prove everything, he said. "The mere fact that something works is no proof that it's any good. Research has only recently begun. In Eastern medicine, they believe in acupuncture. It works as far as they're concerned, and they don't feel the need to prove it.

"People think I have an old black hat and a cape and a stick or something. Ignorance is a problem, because what you don't know you're skeptical about. And I'm still skeptical. I'm not like some acupuncturists that never tell you about the failures. I'm never afraid to tell you that nothing works 100 percent."

Dr. Rand may still be skeptical, but acupuncture gives him an edge that other veterinarians don't have. Through trial and error, he has learned what illnesses respond best to acupuncture treatment. He approaches acupuncture as an adjunct to other treatments and as a last resort before putting an animal to sleep. The average age of the animals he treats is 12 or 13. Most of his patients come to him as referrals from other veterinarians, because the animals can no longer be treated with standard practices.

"By the time pet owners come to me, they're pretty receptive," he said. "A certain breed of person accepts acupuncture. Usually, it's a couple with no children and the animal is their child. That's why I like it. Most veterinarians can go up to a certain point and have to stop, because there's nothing else you can do. What's next? Euthanasia. Whereas, I can go one step further. Then it's strictly

SOME LIKE IT HOT— A horse receives another version of acupuncture treatment as Dr. Rand applies heat through the burning substance atop the needles.

acupuncture. That way it's almost easy because everything else has been done. It narrows the choices and you go with it.

"I just can't figure out why acupuncture works," Dr. Rand said. "I know the theory and why it's supposed to work." One of the key reasons acupuncture works is that it stimulates the body to produce its own pain-killing hormone. Fine needles are used at different acupuncture points, or meridians, on the body. Each meridian is associated with specific bodily functions. For example, if an animal needed an injection of medicine to treat a kidney problem, Dr. Rand would make the injection in a specific kidney meridian.

Acupuncture lends itself to certain problems. In dogs it works well with lack of excretory control, eye problems, non-specific diarrhea, and different kinds of pain (such as in arthritis). For horses, it works best on lameness, wounds, eye problems, some reproductive illnesses, and back problems. Dr. Rand applies a number of variations to his technique. In some cases he inserts needles, then runs an electrical current through them to increase stimulation. Other times, he injects medicine into a specific acupuncture point. If that doesn't work, he'll inject gold beads, which will work indefinitely as long as they stay in place. Or he'll use electrical pads, heat, or pressure. He also uses high frequency sound waves and lasers.

Dr. Rand has documented many benefits of acupuncture, such as with a dog he treated for severe neck pain. The animal came to him from another veterinarian, who had used cortisone and butazolidin, the usual methods of treatment. While the dog was kept on this treatment, he did fine. As soon as he was taken off the medicine, he experienced severe pain. X-rays showed an extreme curvature of the neck's vertebrae.

"Then I treated this dog three times with acupuncture," Dr. Rand said. "The pain was gone. I wondered, 'Did I just kill the pain or did I do something?' I re-X-rayed the dog, and the neck was just as straight as can be. The only way I explain it is that obviously the vertebrae were out of place because of the muscle spasms in the neck. I stopped the muscle spasms, and consequently the vertebrae went back in line. The dog's been fine ever since."

Of course, not all of Dr. Rand's stories are success stories. He remembers a shepherd he treated soon after he began using acupuncture. Referred to him by another veterinarian, the dog had a hip problem which responded well to acupuncture treatments.

"The owner called me one day, and the dog had died. I then found out the dog had liver problems. Had I known, I would have suggested that we not do acupuncture. Why correct the hips when the dog is getting ready to die of some other problem? Now, 10 years later, I do a blood work-up for every potential acupuncture patient. I get the whole history, preferably from the referring vet."

Being selective about which patients qualify for acupuncture not only ensures a higher success rate, it also makes better business sense. Acupuncture sessions take an hour to an hour-and-a-half, costing $50 per session ($100 for horses, plus tranquilizer). "In that hour I could have seen probably four dogs, doing all kinds of other things and making more money than an hour spent with acupuncture. Therefore, I limit the number of cases I do. I can't afford to do only acupuncture."

Dr. Rand started his medical career as a pharmacist, urged by his father to join the family business. He studied in New York, then tried to work with his father. That didn't succeed, so he moved to Miami to practice pharmacy. There, he met and married his wife, Nanci. Finally he admitted his heart wasn't in pharmacy. He followed his desire to study veterinary medicine and came to Auburn on his honeymoon.

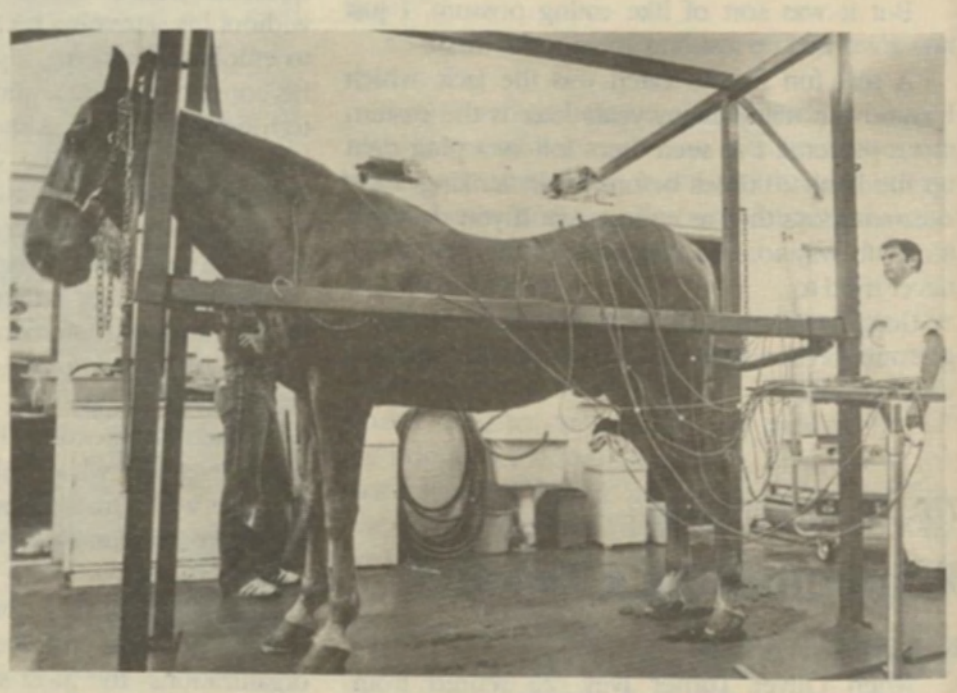
His days at Auburn consisted mostly of studying and some occasional bridge. He remembers vet students didn't associate much with the rest of the campus; there wasn't time. One of the professors with the biggest influence on Dr. Rand was Dean Tom Vaughan '55, then head of the equine department. "I can't work for anybody," Dr. Rand said. "So after my externship in Kentucky, I came to Atlanta and immediately started out by myself. I used to call Tom Vaughan almost every day.

"At that time my practice was only equine [he switched to his small animal practice two years ago], so I would call Tom and tell him everything I was doing and would say I just don't feel comfortable with this, and he would say, 'You are doing fine.' All I needed was a little encouragement and a pat on the back. Gradually I called less and less."

Now Dr. Rand operates his business on 17 acres outside Atlanta, where he also takes care of his own pets, including four greyhounds, two dobermans, a Great Dane, a beagle, four birds, three cats, and six horses. He laments that he no longer lives in the country; the city has come out to meet him. But he admits that Atlanta's growth has been good for business. His problem now is too little time.

Dr. Rand has considered giving up veterinary medicine to do other things, such as teaching (he guest lectures at colleges and high schools) or joining a veterinary manufacturing firm, which would meld his veterinary and pharmacy experience. But he's not really ready to give up his practice. He does get a break from the day-to-day routine through his family and community activities.

He has taken up photography to capture the talent of son Jeb on film. Jeb, a freshman at the University of Michigan, is fourth in the nation in ice skating in the junior pairs division. He hopes to make it to the Olympics in 1992. The Rands' other son, Darren, has stayed closer to home, working in the printing industry



A DELICATE OPERATION—Here, Dr. Rand applies electrical stimulation through acupuncture needles placed strategically along the horse's body.

in Atlanta and attending Georgia State. Daughter Joli attends the American Music and Drama Academy in New York City and plans to become an actress.

An interest in theater must run in the family, as Dr. Rand is assistant house manager at the Alliance Theater in Atlanta, working the doors and security. He is also the local veterinarian for the Ringling Brothers & Barnum & Bailey Circus when it comes to Atlanta each year.

"Every once in a while I'll work the Fox Theater. I was working there one time, and I was talking to this woman. And she was talking to me as if this were my livelihood—working as an usher at the Fox Theater. And I said, 'I don't work here, I just do this for fun.' And she said, 'Oh, what do you do?' I said I was a veterinarian. That's all you have to tell some of these ladies. She said, 'I've got a poodle...' I thought now she's starting on me. And I said, 'Ma'am, I come down here to get away from my practice. I don't want to discuss your poodle.'"

SGA's Harold Melton Graduates, Reflects

By Anita Stiefel '85
AU News Bureau

Harold Melton says he's expanded his major since being elected Student Government Association president last spring. "In addition to majoring in international business, I now have experience in management, public administration, public relations, and political science."

The 21-year-old Marietta, Ga., native, who last spring became Auburn's first black Student Government Association president, walked the aisle along with 739 graduates at winter commencement March 18.

"Each day provided a new challenge, and that made the year exciting," Harold explained. "Being SGA president stretches your capabilities and pushes you to your full potential. There's so much on your mind every day. You have to remember which project you assigned to which person, keep up with which committee is handling which topic and what progress is being made, and on top of all that you have to remember your own commitments."

He says the worst part of being SGA president is the strict schedule and lack of free time. "You can't dump everything and go out with your friends. Because of your responsibilities, you're somewhat isolated from the typical college life. I missed out on a lot of social activities.

"But the past year has been so valuable," he added. "It's given me a great deal of confidence for the future. I've learned to work with people and also to accept things from different perspectives."

The typical day of the SGA president is filled with answering stacks of mail and phone calls as well as preparing for committee meetings and other scheduled activities. The president is a non-voting member of the Board of Trustees, and attends various other meetings—from those of the SGA Budget and Finance Committee to the University Senate. Though he graduates in March, Harold will stay in Auburn until after next quarter's campus elections are held to fulfill his presidential duties and to orient his successor.

Having been active in the SGA since a freshman, Harold decided to increase his participation two years ago. "I was setting goals for my extracurricular activities, and I started looking at the various positions," he explained. "I had an idea of how I would like things done and decided president was the most suitable job for me."

Harold ran away with the election last spring, defeating candidates with strong fraternity ties and widespread popularity. "I think my success was due to a smorgasbord of support," he said. "My activity on campus covered a cross-section, so a wide variety of people saw they could work through me.

"My election reveals that Auburn students are open to all candidates," he continued. "It says they're more interested in qualities that make good leadership—not in what fraternity you belong to or what color you are."

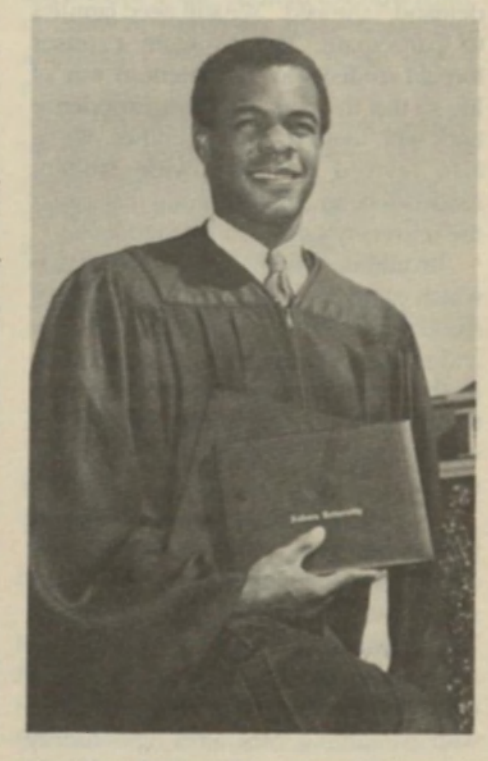
Harold says he never saw racism as a problem at Auburn. "There's segregation among various groups, but I don't feel like there's an attitude attached to it. I think people of similar tastes and attitudes—even within the same race—stay together just for the security of being with people like themselves. At Auburn there are lots of open doors and opportunities for everyone."

Though he's been accepted into law school, Harold is still debating what course to pursue in the future. "A law degree would be helpful no matter what I do because the field is so diverse. But there are some lucrative jobs in international business right now and I might go straight into that."

Harold hopes to someday work for the State Department's foreign service program and spend a couple of years in another country. "Whichever I choose, my biggest concern is to be responsible with the gifts God has given me. I have to be true to myself in whatever I do and not fall into a mold."

He thinks the past year has been successful, but not typical. "Lots of times I don't feel like 'SGA President,'" he explains. "I just feel like good old Harold who is getting a lot of attention and making a lot of speeches. A few years ago I had the same opinions, but nobody wanted to hear them back then," he added with a laugh.

His advice to next year's president? "Don't try to do it all youself, and of the things you do attempt, don't depend on your own strength," he said. "And if you don't agree with someone, listen to them anyway. But most important of all," he added with a voice of experience, "don't ever give away your original documents."



HISTORIC TERM ENDS—Harold Melton, the first black SGA president, graduated March 18. When his presidential term expires in spring, he will decide whether to go to law school or accept a job in international business. *—Photo by AU Photographic Services*

Former AU Athletes Say Graduation is Vital Career Move

By Anita Stiefel '85
AU News Bureau

College athletes should be serious about getting an education, say four of Auburn University's former sports stars who have returned from professional athletics to finish their college degrees.

Former Auburn football greats Jeff Parks and Dowe Aughtman, along with basketball record-holders Gerald White and Frank Ford, were among Auburn's winter graduates on March 18. Each athlete has different plans for the future, but all finished college for the same reason.

"I've always been taught to finish what I start, and that applies to college, too," said Jeff. The gifted tight end and two-time All-SEC and Academic All-SEC player from Gardendale played at Auburn from 1982-1985 before proving a professional success with the Houston Oilers. For two years he has returned to Auburn during NFL off-seasons to finish his degree in speech communication.

"You can't count on a pro career," he continued. "It could end at any time, and when it's over you've got to have something to fall back on. After I finish with football, I'll still have a long life left and I'll need an alternate career. I think I'd like to go into broadcasting after a few more years of playing professionally."

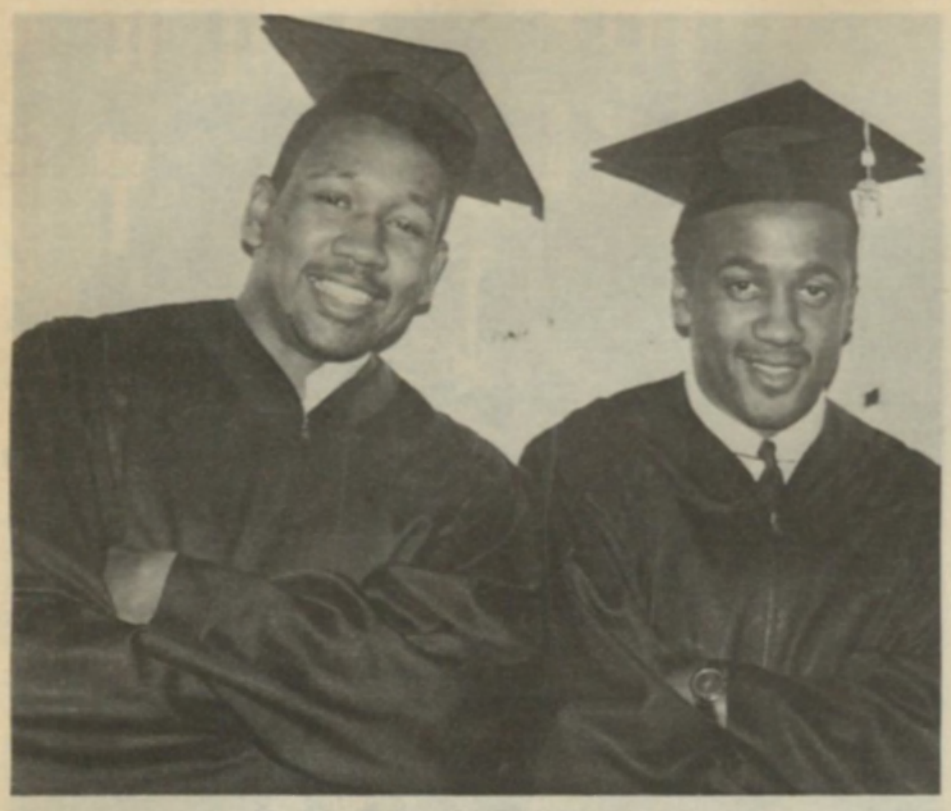
Dowe, who joined the Dallas Cowboys in 1984 after receiving All-SEC honors twice while at Auburn, says football was a great experience but it's part of his history now. After an injury ended his professional career, the Brewton native faced a decision of whether to go straight into the workforce or return to college. "I decided if I didn't finish my degree then, I probably never would," he said. "It's been a long haul, but I'm really glad I finished."

Dowe and his wife, Brenda McWhorter '83, along with one-year-old daughter Catherine, have settled in Auburn. Even after obtaining the sales career he wanted after college, Dowe decided to finish his degree in vocational/adult education. "Auburn is such a part of me," he explained. "It's fulfilling to know I'll finally be among the alumni of such a special place."

Gerald, a four-year starter for Auburn's basketball team, was drafted and later released by the NBA's Dallas Mavericks. Amid several career options, he returned to Auburn to finish his degree in vocational/adult education. Still the holder of Auburn's career and single season records for most assists, the Augusta, Ga., native has not yet decided what his future holds. "I'm not sure what I'll do. I'll either pursue a professional career or go to graduate school or try to coach," he predicted.

Gerald and Frank, members of the 1985 SEC Tournament championship team, are still active with the Auburn basketball program as student assistants. Last summer they directed youth basketball camps around the Southeast, and both admitted that because of the rewarding feeling of seeing young talent develop, they ultimately want careers in coaching.

Frank, who holds the Auburn record for most career games played and is the school's fifth all-time career scorer, briefly played in the NBA with the Los Angeles Lakers before returning to Auburn to finish



LOOK OUT WORLD—Former Tiger basketball stars Frank Ford, left, and Gerald White were among the proud graduates at winter quarter commencement. Ford received his degree in distributive education while White majored in vocational/adult education.

his degree in distributive education. He thinks collegiate sports are a good stepping stone to a professional career but says true student-athletes should take their educations seriously. "It's easy to develop a bad attitude if you're planning only for a pro career," he said. "The wrong attitude is to be only an athlete and not a student. That leaves you open to a whole lot of disappointment."

Remembering his attitude toward college as a highly-recruited high school player in Kissimmee, Fla., Frank advised upcoming athletes to try hard both in the classroom and in athletics. "College is no joke," he said.

"Today, colleges are looking for athletes who are well-rounded and capable in all areas of their lives," Gerald added. "Everybody wants athletes who have the ability to graduate. Even in the pros, athletes are offered monetary incentives to go back to school and finish."

Jeff and Dowe both said that luck and timing play a major role in surviving in professional athletics. "If you're talented and able to make a big name for yourself, you might be able to make big bucks in the pros," Dowe said. "But those guys are few and far between. You have to plan for what you'll do when it's over."

"Even if you get lucky and make it in the pros, you can't lose by having a college degree," Jeff agreed. "You still need a degree to be successful in the working world."

The Qualities of A Good Teacher

By Dean J. T. Vaughan '55
College of Veterinary Medicine

What do I want to be when I go into a classroom? Translated simply and reduced to a personal level, what do I expect of myself? A mere half-dozen characteristics spell the difference between good teaching and not so good.

First, the good teacher is well prepared. Nothing else compensates for or conceals the lack of preparation. Whether lectures or laboratories, the material should be current, organized, and presented in the best means possible. This may range from the blackboard to computer graphics or video disc, but ultimately it hangs or falls on the professor's knowledge of the subject. This is obvious even to the disinterested student.

Second, the good teacher is clear-headed, without the distractions of personal problems. No one is spared life's reverses. Great and small, they leap or crawl into teachers' lives like everyone else's, but they should be left outside the classroom. The ability to compartmentalize these problems and to detach them from the workplace is one of the hallmarks of a professional, whether it be show business or education.

Third, the good teacher is enthusiastic. In the final analysis it matters not so much if the teacher talks funny, smells bad, and has gravy stains on his tie, as long as he is familiar with his subject and eager to tell you about it. He wants the student to know what he knows, to feel the same sense of satisfaction that comes with a thorough understanding, from being a little bit of an authority even. It is an unselfish motivation that finds expression in unexpected places, and can make the dullest subject surprisingly interesting.

Fourth, the good teacher is consistent. Declare in the beginning what you expect of the student, and then stick to it. They need to know what time you close the door to the lecture hall, your office hours, attendance policy, examination methods and schedules, and how their grades will be determined. It goes without saying that they appreciate fairness and impartiality even if the professor is a taskmaster, and credibility is inspired only if he adheres to his own rules.

Fifth, the good teacher is respectable. This implies mutual respect, that generous spirit that flows between student and teacher, and springs from the way they regard each other. Respect, like credibility, must be earned every day. It benefits from standards of behavior and conduct that are socially acceptable, but it depends mostly on the ethical values that govern a person's choices, what he ought to do and be, and what he ought not.

Sixth, the good teacher is creative. When I have done my best, I have provoked the student to think originally and innovatively; to question, even to challenge what he hears and what he reads; to inquire beyond the written text and the frontiers of what is known. Together we have concocted the right chemistry for learning. The student has stimulated the teacher and the teacher has responded to the student. It is this interaction that transforms an ordinary classroom into a magical experience—from lead to gold.

Special Programs Head Has Big Plans for Future

By Steven Stiefel '89

Vivian Larkin's first year in her role as Auburn's coordinator of special programs has been hectic, but she has still found time to improve and expand the services Auburn provides for its minority students. Since assuming the position last April, Mrs. Larkin's first concern has been maintaining the level of services currently offered by the Special Programs Office. She and her staff are working to identify and meet the needs of minority students at Auburn, including approximately 3,000 black, foreign, and over-traditional-age (OTA) students. The staff offers services to help integrate these groups into all aspects of campus life.

One of the largest groups the office serves are the 560 international students, representing 70 countries, on campus. "Almost 85 percent of our international students are involved in graduate research," she explained. "They make a tremendous contribution to the university, and we are going to try to do more for them in return."

One way Mrs. Larkin has accomplished this is by expanding the Host Family Program, which allows international students to interact with local families. "The Host Family Program is so in demand," she said. "We still need families to participate. The program exposes foreign students to the American way of life so that they can carry that experience back with them to their countries. We've also revived the Worldwide Student Association, an advisory group that assists the university's many foreign students.

"In addition, we have initiated a group which caters to the wives of international students, who are typically shut in all day and unacquainted with what is going on in the community. A lot of them begin to feel shut out from the world, so we want to make this an educational experience for them, too."

One of the most popular events for foreign students is the World's Fair, an annual event exhibiting the best of the many international cultures at Auburn. "It's grown so large that we had to move it into the coliseum this year," Mrs. Larkin said. "International students have booths with pamphlets, brochures, and history about their countries, then the grand finale lets us see their talents. It certainly shows that Auburn has a diversity of scholars."

Concerning programs for minority students, Mrs. Larkin said that while much has been accomplished already, new programs to improve retention, academic success, and participation in campus life are still needed.

"Our annual events such as the Harmony Picnic and the Minority Recognition Awards Banquet have been very successful, and we plan to continue them," she noted. The picnic comes on "Campus Unity Day," and everyone is asked to bring someone different from themselves. It's a chance to recognize differences and celebrate them. The banquet centers around academic excellence or special accomplishments. "Last year, we recognized Harold Melton for his achievements as the first black SGA president at Auburn. We also coordinate all of the programs focusing on Black History Month."

An innovation which Mrs. Larkin is especially pleased with is the Mentor Program, which pairs black students with interested faculty members who act as advisors. "This program has gotten off the ground really nicely," she said. "We've had approximately 70 volunteer professors and administrators get involved and have found these relationships grow intensely meaningful. We are expanding this program to include other minority groups, such as students with learning disabilities.

"Improving our minority alumni support is another priority. It's difficult to measure how supportive they have been in the past since only 700 blacks have graduated from Auburn. Most blacks only began to arrive on campus around the late seventies," she noted. "In November, we have our minority alumni reunion during Homecoming. We have had respectable crowds, but participation is definitely something we need to build upon."

Mrs. Larkin said she also hopes to place more emphasis on programs for Auburn's approximately twenty handicapped students. "Consciousness raising is the most important thing we can do right now to help our handicapped students. Most people are not aware of the access problems we have in campus labs and classrooms. We have to make departments more aware of these problems so they can prepare for these students."

SPECIAL PROGRAMS HEAD—Vivian Larkin, Auburn's coordinator of special programs, plans activities for the campus' 3,000 minority, foreign, handicapped, and over-traditional-age students. *—Photo by Mike Jernigan*

The office serves all handicapped students, whether they are mobility-impaired or have "hidden disabilities," such as dyslexia. "We have started up support groups for students with learning disabilities and are coordinating rehabilitation services. We want to identify special tutors in each department and have even begun lending tape recorders to help students who have dyslexia or other sensory disorders."

The Special Programs Office attempts to give individual attention to each of these special students by helping break through the impediments of day-to-day existence on the Auburn campus. "The purpose—just as with all the students we serve—is to emphasize that we are concerned about them, understand their capabilities, and want them to succeed. There's such an untapped wealth of talent and diversity in these students that the classroom is only one form of education for them. We want them to know that they can feel accepted and comfortable in coming to Auburn."

OUTSTANDING STUDENTS—Outstanding students from each of Auburn's colleges and schools were recently selected by the SGA. Front row, left to right, they are: Alicia Edson, Agriculture; Susan Caneva, Nursing; Virginia Albrecht, Liberal Arts; Leigh Hardin, Human Sciences; and Betsy Osterling, Business. Back row: Guy Moulder, Architecture; Joe Keating, Pharmacy; Robert Nettles, Forestry; Eric Steelreath, Engineering; Mike Pauley, Education; Mark Maupin, Veterinary Medicine; and Catherine Jahncke, Sciences & Mathematics.

English Committee Suggests Books For Freshmen & General Readers

A Preliminary Word to Consumers

While we have had in mind the college-bound high school student in producing this list, it is more, perhaps, "a list for all seasons," as much for during and after college as it is for pre-college.

The works in this list, we want to make clear, do not constitute an exhaustive or absolute listing of any kind. They are not the books or the readings which, when digested, magically make one into a fully educated, cultured man or woman. They are not the works about which all freshmen at Auburn University will be tested during their first quarter on campus. They are, rather, simply our suggestions for some valuable, meaningful reading. Most are "indefinitely readable" or "perennially re-readable" pieces, but some will be more readable and some more valuable than others. In making our selections, our suggestions, we have had in mind the definition of literature as "writing in which aesthetic, emotional, or intellectual values are made articulate by excellent expression." Some of our choices may have less pure literary value than they have general intellectual or cultural or social value, but the reading of each, we believe, will be important and valuable for twentieth-century Americans. *Valuable*, evidently, is a word we keep coming back to in discussing the creation of and the uses of this list. It perhaps is the essential word, the key to what guided the guidance we have attempted here.

Two other points should be made briefly. First, because we do want the list to be a helpful guide, we have made specific recommendations for your reading. For example, W. B. Yeats is not simply named, but some Yeats poems are specifically suggested. This does not mean that these are the only or all the "good" poems by Yeats, but they are good poems and poems good for providing an introduction to Yeats' work. More and other fine poems can be found in collections or anthologies (an anthology providing, of course, one or several knowledgeable persons' estimation of a writer's best or most representative works). Our specific recommendations, then, are not intended to be absolute evaluations but reasonable, helpful suggestions for valuable reading. We will be happy, if you would like, to suggest further readings for any particular author in whom you become especially interested.

A glance at the list will show, too, that we have excluded writers who have only recently come into prominence. We hope that there will be some reading of contemporary works, but not enough time has elapsed at this point to test how really valuable or significant these works are. Anthologies of, say, contemporary poetry reflect some judgments and make some selections, of course. If requested, we will be glad to provide a separate list of those who appear to us to be fine contemporary writers, but we have chosen not to include such persons in our main list.

—The Freshman English Committee

NOVELS

American

Clemens, Samuel L. (Mark Twain) —*The Adventures of Huckleberry Finn*
Crane, Stephen—*The Red Badge of Courage*
Ellison, Ralph—*Invisible Man*

SHORT STORIES

American

Anderson, Sherwood—*Winesburg, Ohio*
Faulkner, William—"A Rose for Emily," "Barn Burning"
Hawthorne, Nathaniel—"Young Goodman Brown," "Rappaccini's Daughter," "The Minister's Black Veil"
Hemingway, Ernest—"The Killers," "The Snows of Kilimanjaro," "The Short Happy Life of Francis Macomber"
James, Henry—"Europe," "The Beast in the Jungle," "The Turn of the Screw"
Poe, Edgar Allan—"The Cask of Amontillado," "The Purloined Letter," "The Fall of the House of Usher"

British

Conrad, Joseph—"The Lagoon," "The Secret Sharer," "Typhoon"
Joyce, James—*Dubliners*
Stevenson, Robert Louis—"Dr. Jekyll and Mr. Hyde"

International

Chekhov, Anton P.—"Misery," "The Kiss"
Kafka, Franz—"Metamorphosis," "The Hunter Gracchus," "Jackals and Arabs"
Mann, Thomas—"Death in Venice," "Disorder and Early Sorrow"
Maupassant, Guy de—"Boule de Suif," "A Piece of String"

POETRY

American

Bradstreet, Anne—"Verses upon the burning of her house"
Crane, Hart—"Royal Palm," "Repose of Rivers," "Proem to *The Bridge*," "The River" (from *The Bridge*)
Cummings, E. E.—"Anyone Lived in a Pretty How Town," "A Man who Had Fallen Among Thieves," "Next to of Course God America i," "My Father Moved Through Dooms of Love," "Pity this busy Monster, Manunkind"
Dickinson, Emily—Numbers 49, 67, 214, 216, 303, 341, 435, 449, 465, 650, 712, 986, 1737 (from *The Complete Poems of Emily Dickinson*, edited by Thomas Johnson)
Eliot, T.S.—"The Love Song of J. Alfred Prufrock," "Journey of the Magi," "Sweeney Among the Nightingales"
Frost, Robert—"After Apple-Picking," "Mending Wall," "Death of the Hired Man," "Birches," "The Road Not Taken," "Departmental," "Desert Places"
Hughes, Langston—"Harlem," "Theme for English B," "The Negro Sings of Rivers," "As I Grew Older," "Afro-American Fragment"

Lindsay, Vachel—"The Congo," "Abraham Lincoln Walks at Midnight"
Pound, Ezra—"Salutation," "The Garden," "The River Merchant's Wife: A Letter," "Potrait d'une Femme"
Ransom, John Crowe—"Bells for John Whiteside's Daughter," "Blue Girls," "Dead Boy," "Janet Waking," "The Equilibrists," "Winter Remembered," "Prelude to an Evening"
Robinson, Edwin Arlington—"Richard Cory," "Miniver Cheevy"
Stevens, Wallace—"Sunday Morning," "Anecdote of the Jar," "Poems of Our Climate," "The Snow Man"
Taylor, Edward—"Meditation Eight"
Whitman, Walt—"Song of Myself," "Out of the Cradle Endlessly Rocking," "When Lilacs Last in the Dooryard Bloom'd"

British

Arnold, Matthew—"Dover Beach," "Thrysis"
Auden, W. H.—"Lay Your Sleeping Head, My Love," "In Memory of W. B. Yeats," "Musee des Beaux Arts," "The Unknown Citizen"
Ballads—"Lord Randall," "Sir Patrick Spens," "Barbara Allan," "Edward"
Blake, William—"London," "The Lamb," "The Chimney Sweeper," "The Tyger," "The Garden of Love," "The Human Abstract"
Browning, Robert—"My Last Duchess," "Porphyria's Lover," "Soliloquy of the Spanish Cloister"
Byron, George Gordon—"She Walks in Beauty," Cantos I and II from *Don Juan*, Canto III from *Childe Harold's Pilgrimage*, "Prison of Chillon"
Chaucer, Geoffrey—The General Prologue and two or threetales ("The Nun's Priest's Tale") from *The Canterbury Tales*
Coleridge, Samuel Taylor—"Kubla Khan," "Christabel," *The Rime of the Ancient Mariner*
Donne, John—"Song"; "The Flea"; "The Relic"; Holy Sonnets: 7, 10, 14; "A Hymn to God the Father"; "A Valediction: Forbidding Mourning"
Hopkins, Gerard Manley—"Spring and Fall," "God's Grandeur," "Thou Art Indeed Just, Lord"
Keats, John—"Bright Star," "La Belle Dame Sans Merci," "The Eve of St. Agnes," Odes: "On a Grecian Urn," "To a Nightingale," "On Melancholy," "To Autumn"
Milton, John—"When I Consider How My Light is Spent," Book I of *Paradise Lost*
Pope, Alexander—*The Rape of the Lock, The Seafarer*
Shakespeare, William—Sonnets 18, 29, 55, 71, 106, 116, 129, 130, 138, 144, 146
Shelley, Percy Bysshe—"Mutability," "Ozymandias," "Ode to the West Wind," "Hymn to Intellectual Beauty," "To a Skylark"
Spenser, Edmund—Canto I, Book I, of *The Faerie Queene*
Tennyson, Alfred—"Ulysses," "The Lady of Shalott"
Thomas, Dylan—"Fern Hill," "And Death Shall Have No Dominion," "Do Not Go Gentle into That Good Night," *The Wanderer*
Wordsworth, William—"Intimations of Immortality," "Composed Upon Westminster Bridge," "London, 1802"
Yeats, William Butler—"The Second Coming," "When You are Old," "The Wild Swans at Coole," "In Memory of Major Robert Gregory," "Lapis Lazuli," "Easter, 1916," "Nineteen Hundred and Nineteen"

TRUE TOGETHERNESS—Twins Tina, left, and Tracee Painter of Eufaula were among the 739 students who graduated on March 18. They plan to go on to graduate school together.

A Teacher

(Continued from page 5)

politics, religion, art, sociology, intellectual activity, and economics—and students who didn't like to clutter up their minds with such detail were often frustrated.

Many of Prof. Ivey's former students have favorite stories about him, and Prof. Ivey had a few favorites about his students: One was overhearing a student, who later became one of his colleagues, tell another, "Well, it's time to go off to Ivey's class and get some more of that sociology he calls history."

As he was the first to point out, Prof. Ivey's method of teaching history was far from new. He had traced it to a thirteenth century Moslem, and he drew heavily from Voltaire, but Prof. Ivey constantly sought ways to make history more active, more obvious, and more relevant. Those of us who had been teased by the snippets of economics, philosophy, history, literature, art, etc., that we had received throughout our educational life became immensely attracted to a system that sought to put it all together.

Prof. Ivey himself had "seen the light" as he described it in 1947, and from that time he began organizing all his courses in what he called the cultural approach. In 1963, he published *The Cultural Approach to History for High School Students* and began working with the Alabama Department of Education in presenting workshops for teachers. A few years after his retirement and the death of his wife, Caroline Lawson Ivey '34, whose illness was one of the reasons for his choosing early retirement, he was heavily involved in working again for his cultural approach to teaching in high schools.

In 1974, the Montgomery City Schools gave Prof. Ivey the opportunity to begin a program in the seventh grade, where 2400 students were exposed to his method of teaching history. Working with the teachers, Prof. Ivey, with Prof. Andrew Weaver of Auburn's College of Education as consultant and often intermediary, had the pleasure of seeing his program at work on a large scale, and it continues to make its influence felt in the Montgomery system and in others. Prof. Ivey wrote the material which was edited by alumni Katrina Yielding '49 and Donathon Olliff '57, of the Auburn History Department, a former Ivey student who had become a close friend. As a reporter, I spent a day in three of those classes while the experiment was going on chatting with teachers and students about the "new" method of teaching history and their reaction to it. The teachers and the students were unanimously enthusiastic. Even a school artist, enlisted to help prepare illustrations, had become so involved with the cultural approach that he had incorporated it into his art classes.

Among Professor Ivey's honors was the establishment in the Department of History of the Oliver Turner Ivey Award for Excellence in Social Studies Teaching. The first recipient was one of those original teachers in the Montgomery schools, Callie Conner Brooks '71. With the enthusiasm of Callie and others whom Prof. Ivey inspired with his teaching approach to history, he has continued to contribute to the knowledge and teaching of history.

And appropriately enough, that contribution to knowledge carries on after his death not only through his methods and the students he taught but also through the foundation which he established in his wife's name to provide college scholarships to students who want to become social studies teachers and perhaps in the future to help teachers in that specialty renew their enthusiasm for teaching and for history.

Alumnalities

1927-1939

Joseph B. Solomon works for Boeing Computer Support Service in Huntsville as a telecommunications engineer.

Mark L. Melsen of Birmingham is an ensign in the Navy.

Cheryl A. Oldfield of Gardendale works for the Baptist Medical Center-Princeton in Birmingham.

Clay Boyles of Smyrna, Ga., is a personnel coordinator for Cobb General Hospital in Austell, Ga.

Marvin E. McGraw, Jr., of Hampton, Va., works for PRC Kentron, Inc., as an aerodynamics engineer.

Laura L. Brown is a nurse at Sarasota Memorial Hospital. She lives in Sarasota, Fla., with her husband, **William Bartley Brown** '86.

George R. Creel, III, of Fairfax, Va., works for Edward D. Jones & Co. as a securities dealer.

Pamela L. Humphrey is a production foreman for Ford-Electronics and Refrigeration Corp. in Bedford, Ind. He lives in Bloomington, Ind.

Mark Kantor is an agent for New York Life Insurance in Huntsville.

Andrew Hart of Antioch, Tenn., is a sales representative for Proctor & Gamble.

Mark L. Melsen of Birmingham is an officer in the Navy.

Douglas W. Cotter, Jr., of Barnsville, Ga., works for Motorola C & E in Decatur, Ga., as an account representative.

Anne Marie Grelier is a management trainee for SouthTrust Bank of Alabama in Birmingham.

John L. Harper is a comptroller for Wiregrass Co., Inc., in Enterprise.

Robert C. Horn works for Shape South, Inc., in Dadeville as an accountant. He lives in Auburn with his wife, Lisa, a student.

James C. Cord, DVM, practices at Opp Veterinary Hospital. He lives in Auburn with his wife, Linda, a veterinary student.

Paula L. Shelly works for N. Douglas Perreault in Dothan as an administrative assistant.

Kurt W. Hanbarrier of Baltimore, Md., is an ensign in the Navy.

Leslie W. Williams of Billingsley is golf course superintendent for the Mountain Brook Country Club.

France E. Newton interns for Jordan City Pharmacy in Columbus, Ga.

Cheryl A. Oldfield of Gardendale works for the Baptist Medical Center-Princeton in Birmingham as a social worker.

Ens. **Benjamin H. Walker, IV,** attends flight school in Corpus Christi, Tex.

Tim O. Craig is a forester for the resource management service in Birmingham.

Joseph F. Curlee, Jr., DVM, of Deatsville practices at Harlan Sprague Dawley, Inc., in Prattville.

Colleen J. Tidmore works for Tidmore Nurseries, Inc., in Crossville as a supervisor.

Lance A. Weaver is a broiler supervisor for Fieldale Corp. in Baldwin, Ga. He lives in Cornelia, Ga.

Norman B. Tynes of Orlando, Fla., works for Metropolitan Properties, Inc., in Birmingham as a project director/realtor.

Ens. **Jeffrey M. Younger** is stationed in Newport, R. I.

Darryl G. Brown is an accountant for UAB. He lives in Birmingham.

Susan E. Fuller is an associate engineer for Morton Thiokol, Inc., in Huntsville.

Jeffrey M. Harris is a researcher at the University of Miami in Miami, Fla.

Lynn L. Jones, Jr., works for Mitchell Construction Co. in Vidalia, Ga., as a project manager.

2/Lt. **Kelly R. Collins** of Magnolia Springs has been awarded a Vice Commandant's Award for outstanding achievement in Air Force ROTC officers field training school. She is a legal secretary for David Chapman, III, P. C. in Gulf Shores.

Tom R. Allen of Fort Lauderdale, Fla., is a farmer.

Kim M. Gunnels of Smiths works for NSSI in Columbus, Ga., as a manager.

Deborah L. Guilford of Hartford is an accountant for Warren, Averettt, Kimbrough in Birmingham.

Kathryn E. Nelms lives in LaGrange where she is a project engineer for Hughes Georgia, Inc.

Ens. **Jeffrey R. Von Hor** is stationed in Pensacola, Fla.

Bradley W. Fatzinger works for Spectrum Southeast Development Corp. in Montgomery as a property manager.

Robert Bradford of Gadsden is a buyer for Belk Hudson.

Pvt. **Ronald W. Palmer** of Hamilton is stationed at the Aeromedical Research Laboratory at Fort Rucker.

Eugene G. Thompson of Odessa, Fla., is an ensign in the Navy.

Joseph M. Williams works for NWF Contractors, Inc., in Fort Walton Beach, Fla., as an estimator. He lives in Niceville, Fla., with his wife, Cathy.

Benjamin A. Garrett, II, DVM, practices at Garrett and Kennington, Inc. He lives in Dothan with his wife, **Nancy Wingo**, and son, Benjamin Taylor.

Gregory A. Mays of Walhalla, S. C., is an ensign in the Navy.

Robert D. Champion of Auburn is a navigator in the Air Force.

Robert A. Cain works for MAI Basic Four, Inc., as a branch systems consultant. His wife, **Betsy Houseman,** is a speech pathologist at Atlanta Speech School. They live in Atlanta.

Tim Bridges is a staff accountant with Carmichael, Ingle & White in Atlanta.

Valerie Anne Williams is a graduate teaching assistant at Auburn.

Peggy Greene is working towards her master's at Auburn.

Jeffery (Brent) Hicks of Headland works with the American Buildings Co. as a civil engineer.

Frank Williamson is a graduate research and teaching assistant at Auburn.

Cheryl Bazar is an accountant for Deloitte, Haskins & Sells in Birmingham.

Kenneth Northrop, Jr., of Birmingham works as an executive trainee for Parisian in the Eastwood Mall.

Phyllis Pearson teaches at Chavala High School in Seale, and lives in Auburn.

Shannon Shoemaker of Homewood is an assistant department manager for Parisian in the Riverchase Galleria in Birmingham.

Susan Spencer of Athens, Ga., is an advertising assistant with the *Athens Observer*.

Lisa Davis is a fifth grade teacher at Marion Academy in Marion.

Dawn Henderson is a pharmacist with Revco drugs in Ashville, N.C., and lives in Chandler, N.C.

Kenneth Kelley of Montgomery is a quality engineer with the Dana Corp.

Kevin Nelson of Daphne is a district manager for the Montgomery Beverage Co.

MARRIED: Robert Nelson Gardner to **Leah Glenn** on Sept. 12, 1987. They live in Stone Mountain, Ga.

Alan S. Lee to Sonia Clark on Dec. 19, 1987. He is a quality assurance inspector for Diversified Products. They live in Opelika.

Caren Cecil to Christopher Brechin on June 13, 1987. They live in Colorado Springs, Colo.

Dwight Allan Kent, Jr., to **Karen Bayley** on Oct. 3, 1987. He is a senior production specialist for Electromagnetic Sciences, Inc., in Norcross, Ga., where they live. She works for Hirsch/Bedner & Associates in Atlanta as an interior designer.

Marvin Emmett McGraw, Jr., to **Sandra Mims** on Aug. 29, 1987. They live in Hampton, Va.

Robert (Bo) Chapman to Lisa Renee Webster on Nov. 14, 1987. They live in Franklin, Tenn., where he is a sales representative for Siddiki Brothers, Inc.

Joel Brian Flatt to Camala LeBaron on July 11, 1987. They live in Dothan, where he is an electrical engineer for Sony.

Barabara Lynn Hodges to Dan Richard Elkins on Sept. 12, 1987. They live in Opelika.

Patti Lane Dollar to **Charles W. Porter, Jr.,**'86 on Aug. 29, 1987. She is a nurse at Brookwood Medical Center. They live in Birmingham.

Timothy Randall Lyons to **Fran Pierson** on Aug. 8, 1987. They live in Birmingham, where she is a systems engineer for IBM, and he is a student at Cumberland School of Law.

Rick S. Whitmore to **Catherine M. Giroux** in December, 1987. They live in Fort Worth, Tex., where he is an engineer planner for General Dynamics.

Laura Rae DeLaVergne to Barry King on Oct. 10, 1987. She is an assistant property manager for Aerospace Business Park in Cape Canaveral, Fla. They live in Cocoa, Fla.

Christine Skye McKinney to Scott A. Maurer on July 25, 1987. She is an aerobics instructor/coordinator for American Court and Fitness in Trappe, Pa.

Thomas Christopher Glasscock to **Danelle Nolen** on June 28, 1987. He is a graduate research assistant at Auburn, and she is an industrial engineer at Fort Benning, Ga. They live in Auburn.

Anna Lori Kilgo to Wayne Harris on Aug. 1, 1987. They live in Montgomery, where she is a registered nurse at Baptist Medical Center.

Kimberly Gayle Alise to Richard A. Sims on Sept. 19, 1987. She is a project engineer for Hughes Georgia, Inc., in LaGrange, Ga.

Sylvia Elizabeth Norman to Adam Wilder on Sept. 19, 1987. They live in Atlanta, where she is an accountant for Accounting Financial Services, Inc.

Kristen Lynne Fraser to Andy Bethea on Sept. 5, 1987. She teaches at Lannett High School. They live in Auburn.

Carlene Ramage Green to **Judson Rhodes Langley** '85 in October, 1987. They live in Kennesaw, Ga.

Robertson, Band To Highlight Reunion '88

Nationally-known speaker and author Jeanne Swanner Robertson '67 and the versatile show band "Fall Guys and a Gal" are just two of the highlights in store during Reunion '88, Thursday, June 23 through Saturday, June 25 in Auburn. The reunion, honoring the classes of 1943, 1948, 1953, 1958, 1963, 1968, 1973, and 1978 will begin registration and campus tours on Thursday and end Saturday evening with a Gala Reunion Ball.

A former Miss North Carolina, 6'2" humorist Robertson bills herself as "the tallest contestant ever to lose the Miss America pageant." Her "tall tales" include stories of growing up tall in a small town and her misadventures as a contestant in various beauty contests.

Based in Gainesville, Fla., "Fall Guys and a Gal" have appeared on a number of nationally-syndicated television programs and opened shows for such entertainers as Sammy Davis, Jr., Don Rickles, and John Davidson. The band plays a wide variety of music, including big band sounds, movie themes, jazz, country, and contemporary pop tunes. For those who like variety with their music, band member Jack Williams stars in the "Fall Guys Pantomime," a comedy act which he performs during breaks in the music.

The complete schedule for Reunion '88 follows:

THURSDAY, JUNE 23, 1988

Noon - 8:00 p.m.	Registration Room 217, Foy Union
1:00 p.m.-4:00 p.m.	Campus Bus Tours Highlighting new and old campus landmarks
5:00 p.m.-6:00 p.m.	Reunion Reception Honoring all classes Best Western Ballroom
7:00 p.m.-9:00 p.m.	Welcome Barbecue

FRIDAY, JUNE 24, 1988

8:00 a.m.-6:00 p.m.	Registration
8:30 a.m.-5:30 p.m.	Mini-Seminars Conducted by AU faculty. One-hour sessions include a variety of topics of general interest (See reunion mailings for more details)
5:30 p.m.-6:30 p.m.	Individual Class Social Hours (Cash Bar)
6:30 p.m.-until	Individual Class Dinners

SATURDAY, JUNE 25, 1988

8:00 a.m.-11:00 a.m.	Registration
10:00 a.m.	Class Pictures
11:30 a.m.	Luncheon (Featuring Jeanne Robertson)
8:00 p.m.-12:00 p.m.	Gala Reunion Ball Best Western Ballroom (Featuring "Fall Guys and a Gal")

TALL TALES—Jeanne Swanner Robertson '67, a 6'2" humorist, will be the Keynote Speaker at Reunion '88.

SOMETHING FOR EVERYONE—"The Fall Guys & A Gal" will provide a versatile selection of music at the Gala Reunion Ball, held June 25 at the close of Reunion '88. The members of the group are, clockwise from center: Stephanie Bates Carson, Jimmy C. Carson, Don Rieck, Gary Vogel, Tony Michaels and Jack Williams.

Samford Society Raises $14,000 In First Year

The Samford Society, consisting of graduates from the five most recent classes who have made a four-year giving commitment to support academic excellence at Auburn, recently celebrated its first anniversary with more than $14,000 in its endowed scholarship fund.

Samford Society members make a commitment of $25 their first year, increasing the amount in increments of $25 each year until their four-year commitment is up. The money thus raised is placed in an endowed scholarship fund, enabling President Martin to offer scholarships which help attract academically-gifted students to attend Auburn. First-year donors to the program receive a Samford Society t-shirt, and the Office of Alumni Programs is currently designing a diploma-quality membership certificate for all those who complete their pledges.

"We are very pleased with the success of the Samford Society," said Sheila Eckman, director of alumni programs. "We wanted young alumni to stay involved with Auburn, and what better way for them to do so than through a program that supports academic quality, thereby enhancing the value of their own Auburn diplomas? We have been thrilled by the number of young graduates who share our vision."

Class of 1949 Leads Donors as Alumni Center Building Gets Underway

In mid-March, houses on the site were removed, the construction fence went up, and dirt began to be moved as construction got underway on the Alumni Center. Located at 317 S. College Street, the two-story building will be home to the Office of Alumni and Development, made up of the Auburn Alumni Association, the Auburn University Foundation, and the Development Office of Auburn University. The Alumni Center is scheduled to be complete by the end of the year.

In a $3 million fund drive seeking gifts from Auburn alumni and friends to build the Alumni Center, the total has reached $2.35 million in gifts and pledges. Each alumnus who gives $500 or more will have his or her name permanently inscribed on a plaque on the building. To date, more than 3,400 alumni and friends have made gifts to the building.

The Class of 1949 leads the class competition in donors to the Alumni Center with 99; however, the class of 1969 is closing fast with 98. Not far behind are the classes of 1959 (96) and 1972 (95). The class of 1957 has 90 donors, followed by 1964 with 89, and 1970 with 85. The earliest class with donors is the Class of 1906, which has two donors. Each pledge of $500 to the Alumni Center can be paid immediately or given over five years.

Vet Awards

(Continued from page 1)

Association Public Service Award, and a 1982 International Veterinary Congress Prize. He is a resident of College Park, Md.

Dr. Riddle is retired from his practice—one of the first small animal clinics in the state of Georgia—in Marietta, Ga. The author of three books about his experiences in college and as a veterinarian, he is a past president of the Georgia Veterinary Medical Association and was selected as Georgia Veterinarian of the Year in 1962. He also serves on the College of Veterinary Medicine alumni advisory council and is a member of the Marietta Salvation Army board of directors and the Marietta Hospital Authority.

Sports

Smith Coaches Tigers to 5th NCAA Tourney

For Coach Sonny Smith's Tigers, the last few weeks have been a good news, bad news time. After finishing the regular season with an impressive 18-9 record and an 89-70 whipping of LSU in Baton Rouge, the men's basketball team made a quick exit from the SEC Tournament, bowing 53-50 to Georgia in their first game. Despite their unimpressive showing, Auburn received a fifth consecutive NCAA bid and was seeded in the Southeast region, allowing them to play their NCAA Tournament games close to home.

The home court advantage was less than hoped for as few Auburn fans made the short trip to Atlanta to cheer them on, but the Tigers responded by beating 12th-ranked Bradley in the opening round, 90-86. Bradley boasted the nation's top-scorer in All-American guard Hersey Hawkins, but senior forward Chris Morris had an All-American performance of his own, leading the Tigers with 36 points and 12 rebounds. Senior guard Terrence Howard tipped the ball away from Hawkins in the game's final moments, preserving an Auburn victory in a game in which the Tigers once trailed by 14 points.

In the Tigers' second round game, Oklahoma proved too quick defensively, with the result a 107-87 Sooner win. Four seniors played their final game for the Tigers, including guards Terrence Howard and Johnny Lynn, All-SEC forward Chris Morris, and center Jeff Moore. During their careers on the Plains, Auburn went to the NCAA tourney every year and never lost a first-round game. Their best showing came in 1985-86, when the Tigers finished 22-11 and advanced to the NCAA final eight.

Lady Tigers Enter NCAA Tourney, Crush Penn State

After a disappointing 73-70 loss to the Tennessee Volunteers in the championship game of the SEC Tournament in Albany, Ga., the Auburn Lady Tigers bounced back with their sixth bid to the NCAA tournament in seven years and a second round 94-66 victory over Penn State. The Tigers, who enter the next round of tournament play with a 29-2 overall record, were seeded number one in the mideast region and did not have to play in the tournament's first round.

Auburn Coach Joe Ciampi feels confident about the Lady Tigers' chances in the tournament, despite the fact that they will face some of the top teams in the nations on their home courts during the tournament. "We are fortunate to be the top seed and playing in the mideast because it is close to home," he said. "But this team is prepared to play anyone, anywhere, at any time because of the strength of our schedule. We learned a great deal from our tournament experience last year."

Junior center Vickie Orr continues to lead the Tigers in scoring with 16.9 points per game, while senior forward Sharon Stewart is the leading rebounder with 8.4 per contest. Rounding out the Tigers' starting five in tournament play are senior Mae Ola Bolton at forward, and senior Diann McNeil and junior Ruthie Bolton at the guard spots.

SCORING MACHINE—Junior center Vickie Orr looks for two in the Lady Tigers' rout of Penn State in the opening round of the NCAA Tournament. She leads the Lady Tigers in scoring with 16.9 points per game. *—Photo by Steve Stolk*

Auburn to Host SEC Track & Field Championships

Auburn's Wilbur Hutsell Track will play host to the 1988 Men's and Women's SEC Track and Field Championships May 12-15. Events will begin Thursday at 11 a.m. with the decathlon and heptathlon, then continue through Sunday, when the finals of most events will be held.

Track and field events in the four-day competition will include relays, steeplechase, hurdles, triple jump, javelin, pole vault, high jump, shot put and discus. For more information, contact the Auburn Athletic Department at (205) 826-4750.

Tracksters Complete Indoor Season in NCAA Competition

The Tiger men's and women's track teams concluded the 1988 indoor season recently with performances at the NCAA Championships in Oklahoma City, Okla. The men's team gathered 14 points, good for a seventh-place tie with Baylor, Boise State, and Pittsburgh.

The men's effort was led by sprinter Clifton Campbell, who won the 400-meter dash with a time of 46.40 to become Auburn's first individual NCAA champion since Stanley Floyd won the 100-meter dash in 1980. The Tigers' 1,600-meter relay squad of Karim Sanders, Kelly Carter, Roddie Massey, and Campbell finished fourth in that event, with a time of 3:10.76. Men's Coach Mel Rosen was pleased with his team's showing. "This is our best finish since 1979," he noted, "And we are very pleased with that. This shows that we are among the top teams in the country."

The Lady Tigers were represented by Sissy Costner in the high jump and Brenda McDonald and LaKeta Ziegler in the triple jump, but failed to score. Still, women's Coach Lee Gower was happy with the team's performance during the year. "I feel good about the indoor season," he said. "We made progress along the way and hopefully that will carry over to the outdoor season. Competing in the NCAA championships was a good experience, but now we are looking ahead to the future."

Tiger Baseball Team Roars Back After Rocky SEC Start

The Tiger baseball team got off to a rocky start in SEC play, losing two of three games to Vanderbilt in Nashville before bouncing back with a home sweep of Ole Miss and a road sweep of Georgia. At press time, the Tigers sported a 16-5 record overall, 7-2 in the SEC.

The series against Ole Miss was a real confidence builder for Coach Hal Baird's Tigers. Auburn outscored the Rebels 20-1 in the series, winning by scores of 5-0, 1-0, and 14-1. The Tigers also pounded Georgia Tech in Atlanta earlier in the week, winning the contest 14-3. After dropping a mid-week contest to the Virginia Cavaliers, the Tigers' bats got hot during the weekend series in Athens. Auburn outscored the Bulldogs 8-3, 7-4, and 18-5 on the way to their first road sweep of the season.

Pitching has been the Tigers' strong suit so far throughout the young season. Through 21 games, Auburn hurlers have compiled an impressive 1.76 team earned run average.

Ciampi a Teacher On and Off Court

By Laura C. Barnwell '89

From the court one hears a basketball bouncing, feet pounding the hardwood, and players yelling, but something is missing—the roar of the crowd. The Auburn Lady Tigers, one of the top-ranked teams in the nation, are playing an important SEC game; but, as usual, fewer than 1,000 fans are on hand to cheer them on to victory.

Small crowds for women's basketball are the norm at Auburn, despite the remarkable successes of Lady Tiger basketball in recent years. But head coach Joe Ciampi and his team don't let it affect them—they keep on winning anyway. Since Coach Ciampi's arrival in 1979, his teams have compiled a 190-57 win-loss record for a .769 winning percentage. They have also won back-to-back SEC crowns. Still, attendance remains low. Coach Ciampi, the 1988 SEC Coach of the Year and the 1987 NCAA Coach of the Year, prefers not to think about the problem for fear of getting depressed. Instead, he rates the team's base group of supporters as great.

Coach Ciampi's involvement with basketball began when he first played on an organized team in third grade. "In the area I come from in Pennsylvania, everyone becomes involved in sports at a very

young age." After graduating from Mansfield University in 1968 with a degree in education, he began coaching high school boys' basketball in Pennsylvania and New York. In nine seasons at the high school level, he compiled a .788 winning percentage.

His success did not go unnoticed, and in 1977 West Point asked him to begin a women's basketball program at the academy. His team, comprised only of freshmen and sophomores, played a varsity schedule and posted an 18-5 record the first season. West Point presented Coach Ciampi with a saber for his success in establishing the program. The saber now hangs in his office, where he admits "you don't see too many other things not related to basketball. Receiving the saber is one of the highest civilian honors you can receive at West Point. That is pretty important to me."

In addition to his saber, pictures of his many winning teams cover the office walls. Coach Ciampi's proudest moment at Auburn occurred when the Lady Tigers reached the final eight of the NCAA tournament last season, but he's also proud of the 1986-1987 team winning both the SEC regular-season and tournament titles.

Even though Tiger victories have produced many of Coach Ciampi's proudest moments, practice is his favorite time. "I could live without playing a game, but I'm not sure the players could." He enjoys coaching in practice, personally working with his players while teaching and blending them into Lady Tigers. "I mold players into mature adults ready to take on the real world." He favors coaching women over men because he feels the environment in men's basketball stresses discipline rather than learning.

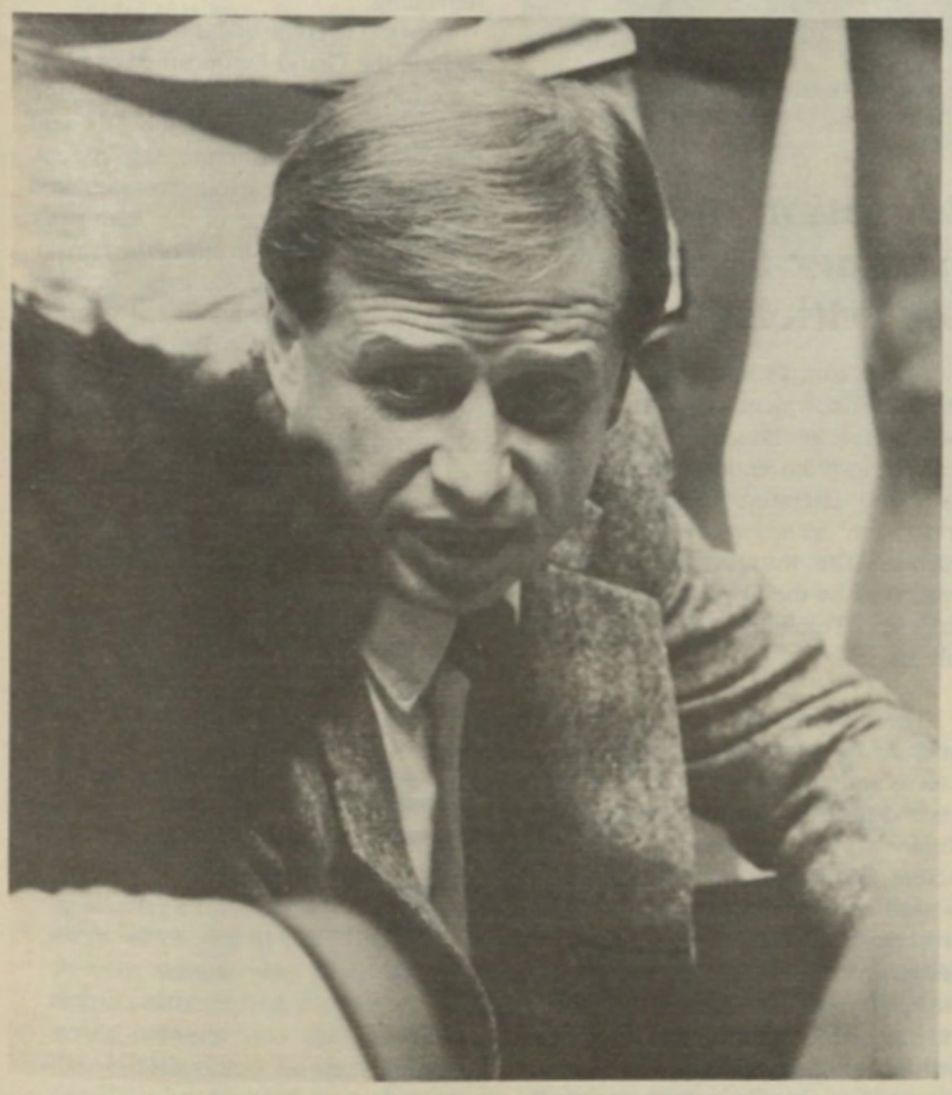
While teaching players is Coach Ciampi's favorite aspect of coaching, he understands the importance of winning as well. "Winning is the only important thing in this society," he said. "If you look at my record for the past 20 years, I think I have proven myself in that area. Coaches must prove themselves year after year."

Coach Ciampi, who is also the assistant athletic director in charge of athletic affairs, summer camps, and training room-related activities, says it is possible for him to go home and not think about either basketball or Auburn athletics. "You could walk into my house and never know I'm a basketball coach," he said. He thinks about his four daughters—Lisa, Dawne, Kelli, and Meghan—to put the Lady Tigers out of his mind.

This year, putting the team out of his mind is proving more difficult because his daughter, Lisa, is a Lady Tiger. Coach Ciampi said he received numerous warnings about problems which might result from coaching his own daughter. "I feel those statements were made by people afraid to know their children," he said. "I say don't speak until you try it." He has enjoyed the experience and thinks there is no better way to experience the father-daughter relationship. He credits Lisa with handling the difficulties of being a Lady Tiger and the coach's daughter well.

Lisa also enjoys the experience. "Since I have been playing we have become really good friends; we know each other better now," Lisa said. She understands that her dad is tougher on her so it will not seem he is favoring her. While it was a little difficult at first, Lisa now says that keeping dad Ciampi separate from Coach Ciampi is easy.

PEN PALS—Lisa Ciampi, a Lady Tiger, meets her pen pals from John S. Clarke Elementary of Pottsville, Pa. John Spleen's fourth grade class "adopted" the Lady Tigers as their pen pal project. The pen pals met before the Lady Tigers' game with Wilkes College, Pa.



A WINNER—Lady Tigers Coach Joe Ciampi, who has compiled an impressive 190-57 win-loss record since his arrival in 1979, claims practice as his favorite part of coaching.

Based on his past record, predicting continued success for the Lady Tigers would be easy as well. But Coach Ciampi offers no predictions for the future. He does make a promise. "All future teams I put on the floor here will be disciplined teams with players that have a team concept and know that to be successful they must play the defensive end of the court. To me, defense is the difference between winning and losing."

With that philosophy, he has built the Lady Tigers into a perennial contender for national honors. Coach Ciampi, with his teaching and coaching skills, has been the difference between mediocrity and excellence.

Football Tigers To Play Eight At Home in '88

For the first time in six years, Auburn will play eight home football games during the coming season. Away contests against the University of Kansas Jayhawks and the Mississippi State Bulldogs will be played in Jordan-Hare Stadium instead, leaving the Tigers to travel only to Gainesville (Florida), Baton Rouge (LSU), and Birmingham (Alabama) during the coming campaign.

The Kansas game, originally scheduled to be played at the Jayhawks' home field in Lawrence, Kan., was moved to Auburn because of the prospects of greater attendance and a larger gate. The Tigers and Mississippi State will swap sites for their next two games, with the Bulldogs traveling to Auburn in 1988 and the Tigers going to Starkeville in 1989.

With the changes, Auburn's 1988 football schedule is now as follows: KENTUCKY, Home, Sept. 10; KANSAS, Home, Sept. 17; TENNESSEE, Home, Sept. 24; NORTH CAROLINA, Home, Oct. 1; Louisiana State, Away, Oct. 8; AKRON, Home, Oct. 15; MISSISSIPPI STATE, Home, Oct. 22; Florida, Away, Oct. 29; SOUTHERN MISSISSIPPI, Home, Nov. 5; GEORGIA, Home, Nov. 12; and Alabama, Away, Nov. 25.

For Your Information

Street Dancing & Village Fair to Highlight A-Day

The annual A-Day gridiron battle won't be the only game in town during the weekend of April 29-30, as activities ranging from a street dance to an arts and crafts show will be held in Auburn to coincide with the football festivities.

Activities will begin on Friday, April 29, with live entertainment and a street dance on Magnolia Ave. from 6:30 p.m. until midnight. Music will be provided by "George Corradino and the Notables," and the evening will also feature appearances by campus athletic and academic "celebrities." Food from a number of local restaurants will be available. In case of rain, the activities will be moved under the new Auburn city parking deck on S. Gay St.

Saturday, April 30, will feature the annual Auburn "Village Fair," held in Samford Park on the university campus. The fair will include an arts and crafts sale, musicians, storytellers, clowns, and a variety of food and refreshments. Admission is free and booths will be open to the public from 9:30 a.m. until 4:30 p.m.

Auburn SGA Offers Second Chance on Past Class Rings

Lost your Auburn class ring or just never got around to ordering one? Thanks to a program sponsored through the Student Government Office, class rings from all past Auburn or Alabama Polytechnic Institute class years are available.

These rings are available in either 10-carat gold or cubic zirconium. For prices and more information about the program, contact Todd Carroll at the Auburn Student Government Association, Foy Union Building, Auburn University, AL 36849, or call (205) 826-4240.

AUM Offers 1-Day 'Old South Tour'

A one-day expedition to explore the by-gone days of the "Old South" is being offered by Auburn University-Montgomery's continuing education program. Participants on the guided bus tour of historic homes and sites in Butler County on Saturday, April 23, will see the "Old South" in its original setting, exploring the plantations and villages where families have lived in the same homes for 150 years.

Included in the tour is the earliest settled area of the county, where Judge Anderson Crenshaw built his home in 1835. Judge Crenshaw, for whom Crenshaw County was named, was the first graduate of the University of South Carolina and a prominent political figure in Alabama's early history. His family included Bolling Hall Crenshaw, one of the triumvirate who directed Auburn University during the depression. Guiding the tour will be Annie Crenshaw, great-great-great granddaughter of Judge Crenshaw. A genealogy instructor at AUM, Miss Crenshaw has extensive knowledge of local and family history and folklore.

An old-fashioned lunch on the grounds at the country church of Mt. Moriah is included in the tour, which will run from 9 a.m. until 4 p.m. The cost is $45 per person, with departure from Montgomery. For more information, contact the Department of Continuing Education at AUM at (205) 271-9341.

Alumni Tracksters Brunch on May 15

All former Auburn tracksters are invited to attend an Alumni Track Brunch, to be held Sunday, May 15, in conjunction with the SEC Track and Field Championships at Auburn's Wilbur Hutsell Track. The brunch, honoring all former Tiger track athletes, will be held from 9 to 11 a.m. in the Student Activities Building. The finals of most events in the SEC track and field competition will get underway at noon.

Invitations have been sent by the Alumni Association to all former Tiger tracksters. If you have not received an invitation, or if you just need more information, contact Debbie Duncan in the Alumni Office at (205) 826-4234.

Education to Offer Summer Institute On Criticism

Thanks to a $320,024 grant from the National Endowment for the Humanities, the College of Education will offer a summer institute entitled "Literary Criticism and Literature: Knowledge and Application" for secondary school English teachers. The institute, which will be conducted by the Department of Curriculum and Teaching, is set for June 22-July 30.

The institute will offer an intensive study of the major areas of criticism as well as an introduction to ways in which basic critical theories can be applied to literary works. The program will include lectures by critics from major universities as well as seminars, workshops, media presentations, and special events, all designed to assist teachers in improving the quality of instruction of literature at the high school level. Follow-up activities will include participation in two conferences to be held at later dates in centrally-located U.S. cities.

For further information, write Douglas Alley, Department of Curriculum and Teaching, 5040 Haley Center, Auburn University, AL 36849.

Tiger Baseball Camp Taking Applications

The 1988 Auburn University baseball camp with Tiger baseball coach Hal Baird and his staff is set to be held in two sessions, June 26-30 and July 10-14. The June session will be open to children ages nine through 13, while the July session is for those age 14 through the 11th grade. Applicants will be accepted on a first-come, first-serve basis, with enrollment limited to 100 campers.

The camp will feature individual instruction in pitching, hitting, bunting, base-running, and other skills provided by Coach Baird and assistant coaches Steve Renfroe and Ed Thayer. Dorm rooms are provided for camper use, and day-camper rates are also available. For more information on rates and schedules, write Coach Hal Baird, Auburn Tiger Baseball Camp, P.O. Box 351, Auburn, AL 36831-0351.

Four Tours Left For 1988 War Eagle Travelers

There's still plenty of time left for those wishing to take part in the remaining War Eagle Travelers Program tours for 1988. Sponsored by the Auburn Alumni Association, the program has four tours remaining.

Trips still to come in this year's program include the Grand European cruise, May 3-15; the La Belle Provence voyage, June 4-15; the Swiss Bavaria tour, July 3-12; and the Danube River adventure, Aug. 29-Sept. 11. Details on all these tours were featured in the February issue of the *Alumnews*.

Anyone interested in any of the remaining 1988 tours or the War Eagle Travelers Program can receive additional information by writing to Pat Brackin, Auburn Alumni Association, 116 Foy Union, Auburn University, AL 36849, or calling (205) 826-4234.
